О компании MEAN WELL

Компания MEAN WELL Enterprises Co., Ltd. образована в 1982 году. В настоящее время MEAN WELL является одним из крупнейших тайваньских производителей источников питания.

Номенклатура изделий фирмы включает несколько тысяч наименований источников питания AC/DC, конверторов DC/DC и инверторов DC/AC,

производимых на заводах в КНР и на Тайване. Продукция компании характеризуется высоким качеством, конкурентоспособными ценами и широтой номенклатуры.

Особенно хорошо представлена номенклатура источников питания AC/DC. Это промышленные источники питания в открытом и закрытом исполнениях для встраивания в промышленную аппаратуру различного назначения, источники питания типа «desk top» и «wall mount», выполненные в виде законченных внешних устройств питания ноутбуков и другой бытовой и промышленной техники, лабораторные источники питания и др.

Продукция MEAN WELL соответствует международным стандартам по электромагнитной совместимости и электробезопасности, что подтверждено сертификатами UL, cUL, CSA, TUV, CE.

Система менеджмента качества компании соответствует стандарту ISO 9001.

Компания MEAN WELL специализируется исключительно на разработке и производстве готовых источников питания.

Она выпускает:

сетевые источники питания в корпусе для монтажа на шасси мощностью от 15 Вт до 8 кВт;

открытые источники питания для монтажа на шасси мощностью от 5 до 250 Вт;

источники питания для монтажа на печатную плату мощностью от 5 до 20 Вт;

источники питания на DIN-рейку мощностью от 20 до 960 Вт;

полузаказные конфигурируемые клиентом источники питания мощностью 450-1000 Вт;

сетевые адаптеры питания мощностью от 5 до 120 Вт;

зарядные устройства мощностью от 108 до 360 Вт;

DC/DC-преобразователи для монтажа на печатную плату мощностью от 0,5 до 30 Вт;

DC/DC-преобразователи для монтажа на шасси от 5 до 350 Вт;

DC/AC-инверторы мощностью от 150 до 2400 Вт.

Your Reliable Power Partner

Medical Power Supply

AC/DC Switching Power Supplies & DC/DC Converters

Company Profile

Established in 1982, MEAN WELL is a leading standard switching power supply manufacturers in the world. MEAN WELL currently operates under five companies in Taiwan, China, USA and Europe and three factories in Taiwan, GuangZhou and SuZhou. The product lines include AC/DC switching power supplies, DC/DC converters, waterproof LED drivers, adaptors, DC/AC inverters and battery chargers. We have over 10,000 standard models widely used in medical, automation, communication, LED lighting, display, and office automation fields.

The whole product lines have supplied more than 80 series and 500 models in total for customers to choose, covering 1~1200W and offering 3~55V single/multiple output voltages. We have devoted to developing green medical power supplies, thus unveils the energy-saving medical power supplies in compliance with DoE Level VI.

MEAN WELL USA

MEAN WELL EUROPE

The medical power supplies of MEAN WELL not only comply with IEC60601-1 3rd version but also possess 2xMOPP and MOOP levels, providing the highest level of isolation protection that are suitable to be applied to type BF (patient contact) devices. The whole product line all passes the international safety regulations — UL/CUL/TUV/EAC/CB/CE/FCC and electromagnetic compatibility (EMC) testing thus further assure the safety for usage that is suitable for household medical devices and various medical apparatuses used in the hospital .

With more than almost 40 years of experience in R&D and production of standard power supplies, MEAN WELL has twelve product categories covering more than 10,000 models, to provide “One Stop Shopping” power solutions. Every product in the MEAN WELL range is the result of rigid procedures governing design, design verification test (DVT), design quality test (DQT), component selection, pilot-run production, and mass production.

With more than 200 distributors globally, the MEAN WELL products are distributed to over 80 countries worldwide. The small size orders can expect delivery within 24 hours without MOQ requirement. If you are looking for switching power supply with high reliability, good quality, reasonable price and full series products which can satisfy your various demands, MEAN WELL, a total solution provider, is definitely your first choice!

Reliable Quality

The brand name "MEAN WELL" is defined as "have good intentions". We strongly believe that the product quality is the life of power supply manufacturer. "To become the reliable power partner" has been the motivation for MEAN WELL to grow continuously.

In 1994, MEAN WELL acquired the ISO9001 certification and began to implement the total quality management (TQM) system, which are audited by TUV annually to continuous review and improvement. In April 2013, MEAN WELL acquired the ISO14000 certification and obtained the OHSAS18001 system (ESH, environmental safety and health) in 2015, to take the concept of environmental protection into action, and expect to create a safe and healthy life.

OHSAS18001

ISO9001

ISO14000

MEAN WELL medical power supply products comply with UL/CUL/TUV/CB/EAC/CE/FCC certificates, including ANSI/AAMI ES60601-1/ES60601-1-11, TUV EN60601-1/EN60601-1-11, TPTC004, IEC60601-1, EN55011, EN55032.

MEAN WELL has a complete quality management system. To ensure product quality, 100% burn-in test, function test and pressure test have been applied in manufacturing process, while the MIL-105E sampling method used in IQC, PCBQC (semi-finished products testing) and FQC phases. In the R&D stage, MEAN WELL quality engineers customize the "Test Plan" for each product, to complete the verifications of DFMEA, DVT/DQT, ORT, EMC, drop test, vibration test, thermal shock test, and reliability test.

In production stage, the product engineers co-work with process engineers to review the pilot run, semi-finished products quality control, process checking, finished product quality control, and the feedback analysis as well as the production problems occurred.

The Difference between MOPP and MOOP in IEC 60601-1 3rd

In 2005, the International Electrotechnical Commission (IEC) published the third edition of medical safety standard (IEC60601-1: 2005), to replace the original second edition (IEC60601-1: 1998). The main difference between the 2nd edition and 3rd edition is the insulation level. The 2nd edition is divided into BI (Basic Isolation), SI (Supplementary Isolation), DI (Double Isolation) and RI (Reinforced Isolation), and the 3rd edition of new IEC60601-1 is divided into two categories of MOPP and MOOP.

The major impact of 3rd edition is the distinction made between operator and patient. As result, Means of Protection (MOP) was introduced and it is further categorized into 2 different classifications, which are Means of Patient Protection (MOPP) and Means of Operator Protection (MOOP).

It is the responsibility of the medical product manufacturer to determine the likelihood of a patient coming into contact, and decide whether patient protection (MOPP) or operator protection (MOOP) to use. If the medical devices come into contact with patients, they must meet the insulation requirements of MOPP.

In either case, the insulation between PRIMARY to SECONDARY must meet at least 2 x MOP and at least 1 x MOP between PRIMARY to protective earth (FG) at normal conditions. It is shown on Figure 1.

A power supplies that meet 2 x MOPP standards provide the highest level of protection. It can be advantageous to specify a 2 x MOPP power supply because it can cover most of medical applications.

Medical Bed

Ambulance

AC/DC External Adaptor

6~220W

Features

- Various styles:
Desktop or wall-mounted
Fixed or interchangeable input plug
- Output voltage from 5V to 48V available
- Class I & II models available
- ANSI/AAMI ES60601-1-11, EN60601-1-11
household medical regulations
- Medical safety approved (2xMOPP)
- Suitable for BF application with appropriate
system consideration (except GSM40A~220A)
- Various DC plug type for choice
- Low leakage current < 50~100 μ A
- No load power consumption < 0.075~0.15W
- Energy efficiency Level VI
(6W and 18~60W 5~9V for Level V)
- High operating temperature up to 70°C
- Other DC plug options are available
- Comply with EISA 2007/DoE, NRCAN,
AU/NZ MEPS, EU ErP and meet CoC version 5
- 3 years warranty

AC/DC Open Frame Type

30~500W

Features

- Complete size for choice.
3"x2", 4"x2", 5"x3", 7"x4.2"
- Single and multiple outputs
- Medical safety approved (2xMOPP)
- Suitable for **BF application** with appropriate system consideration (except RPS/D/T-75)
- Class I & II models available
- Low leakage current <math><100\sim300\mu A</math>
- No load power consumption <math><0.1\sim0.75W</math>
- Remote ON/OFF , remote sense ,
5V standby output ,12V auxiliary output,
P.G./P.F. signal for selected models
- 3 years warranty

AC/DC On Board Type

5~90W

Features

- Small PCB mount models
- Output voltage from 3.3V to 48V available
- Medical safety approved (2xMOPP)
- Suitable for BF application with appropriate system consideration
- Class II power unit
- Peak power up to 110%
- EMI class B without additional components
- Low leakage current <math><80\sim300\mu A</math>
- No load power consumption <math><0.075\sim0.1W</math>
- $-40\sim+85^{\circ}C$ operating temperature
- Screw terminal type available (30~90W only)
- 3 years warranty

■ Mechanical Specification for MPM Series

AC/DC Enclosed Type

100~1200W

Features

- Medical safety approved
(2xMOPP for NMP/RPS-C series, MOOP level for MSP series)
- Suitable for BF application (NMP/RPS-C series)
- Output voltage from 3V to 55V available
- Class I power unit
- Low leakage current <math><100\sim 450\mu A</math>
- No load power consumption <math><0.3\sim 0.8W</math>
- Built-in remote ON/OFF, remote sense, current sharing, 5V standby output, 12V auxiliary output, DC OK signal for selected models
- -40~+70°C wide operating temperature
- 5 years warranty for NMP/MSP series
3 years warranty for RPS-C series

DC/DC Converter

1~20W

Features

- Various package: SIP7, DIP
- Low patient leakage current $<2\mu\text{A} \sim 5\mu\text{A}$
- 2 x MOOP / 2 x MOPP
- 6KVDC / 4.2KVAC or 4KVAC high I/O isolation
- Different input range ($\pm 10\%$, 2:1)
- ANSI/AAMI ES60601-1 medical safety approved
- $-40 \sim +90^\circ\text{C}$ operating temperature
- 3 years warranty

Your Reliable Power Partner

DIN Rail Power Supply

AC/DC Switching Power Supplies

Company Profile

Established in 1982, MEAN WELL is a leading standard switching power supply manufacturers in the world. MEAN WELL currently operates under five companies in Taiwan, China, USA and Europe and three factories in Taiwan, GuangZhou and SuZhou. The product lines include AC/DC switching power supplies, DC/DC converters, waterproof LED drivers, adaptors, DC/AC inverters and battery chargers. We have over 10,000 standard models widely used in medical, automation, communication, LED lighting, display, and office automation fields.

The whole product line of MEAN WELL for DIN rail category has supplied more than 52 series and 165 models ranging from AC/DC power supply 10~960W, DC/DC Converter 15~480W and several supplementary units, covering inrush current limiter , redundancy module , buffer module and DC UPS functions.

MEAN WELL USA

MEAN WELL EUROPE

Besides thorough product categories, another highlight of MEAN WELL products is the complete safety approval, including UL, CUL, TUV, SEMI and GL safety regulations, also passing EN55032 electromagnetic compatibility (EMC) testing for customers to choose.

With more than almost 40 years of experience in R&D and production of standard power supplies, MEAN WELL has twelve product categories covering more than 10,000 models, to provide "One Stop Shopping" power solutions. Every product in the MEAN WELL range is the result of rigid procedures governing design, design verification test (DVT), design quality test (DQT), component selection, pilot-run production, and mass production.

With more than 200 distributors globally, the MEAN WELL products are distributed to over 80 countries worldwide. The small size orders can expect delivery within 24 hours without MOQ requirement. If you are looking for switching power supply with high reliability, good quality, reasonable price and full series products which can satisfy your various demands, MEAN WELL, a total solution provider, is definitely your first choice!

Reliable Quality

The brand name "MEAN WELL" is defined as "have good intentions". We strongly believe that the product quality is the life of power supply manufacturer. "To become the reliable power partner" has been the motivation for MEAN WELL to grow continuously.

In 1994, MEAN WELL acquired the ISO9001 certification and began to implement the total quality management (TQM) system, which are audited by TUV annually to continuous review and improvement. In April 2013, MEAN WELL acquired the ISO14000 certification and obtained the OHSAS18001 system (ESH, environmental safety and health) in 2015, to take the concept of environmental protection into action, and expect to create a safe and healthy life.

OHSAS18001

ISO9001

ISO14000

MEAN WELL DIN Rail power supply products comply with UL / CUL / TUV / CB / CE / GL / SEMI certificates, including UL508, UL1310, UL62368-1, TUV EN62368-1, TUV EN61558-1 /-2-16, IEC 62368-1, SEMI F47, GL, EN55011, EN55032.

MEAN WELL has a complete quality management system. To ensure product quality, 100% burn-in test, function test and pressure test have been applied in manufacturing process, while the MIL-105E sampling method used in IQC, PCBQC (semi-finished products testing) and FQC phases. In the R&D stage, MEAN WELL quality engineers customize the "Test Plan" for each product, to complete the verifications of DFMEA, DVT/DQT, ORT, EMC, drop test, vibration test, thermal shock test, and reliability test.

In production stage, the product engineers co-work with process engineers to review the pilot run, semi-finished products quality control, process checking, finished product quality control, and the feedback analysis as well as the production problems occurred.

Product Range

AC/DC Power Supply

- 10~960W
- 1 ϕ , 2 ϕ , 3 ϕ , AC input
- 5V~48V
- Class I & II models

Page

7

DC/DC Converter

- 15~480W
- 2:1, 4:1 or 10:1 wide input range
- 3.3~48V
- -40~+85°C ultra-wide operating temp.
- EN50155 railway standard (120W~480W)

Page

14

Supplementary Units

- 16A & 28A AC inrush current limiter
- 20A & 40A redundancy module
- 20A & 40A buffer module
- 40A DC UPS module

Page

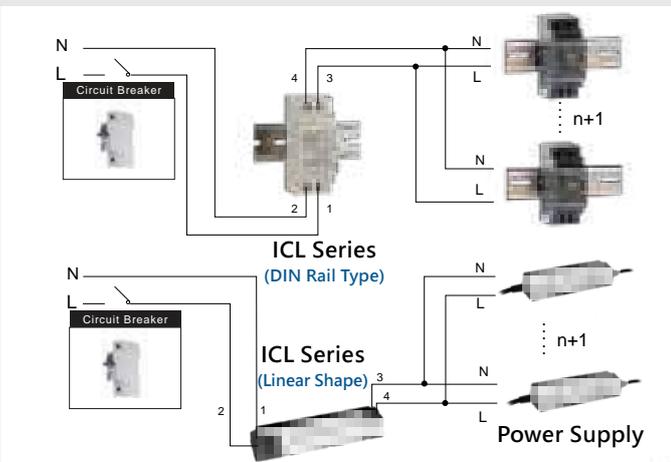

16

Supplementary Units

AC Inrush Current Limiter

ICL Series

Allow more power supplies and large capacitive loads on the same circuit breaker.

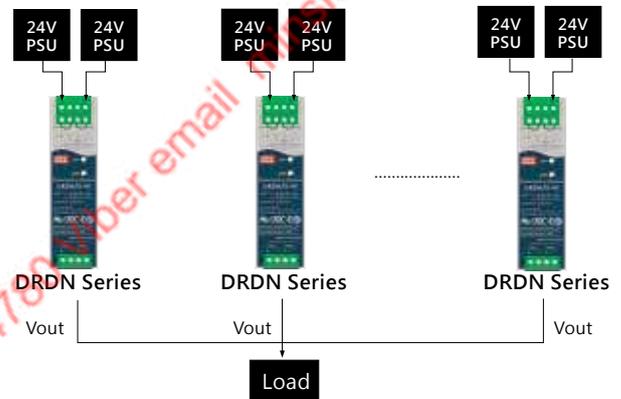

Note: Fewer circuit branches are required to support the same number of power supply installations, reduce system cost.

Redundancy Module

DRDN/ERDN/DR-RDN Series

Secure highest reliability and stability in 1+1 or 1+N.

1+N Redundancy : Using 1 more PSU as the redundant unit

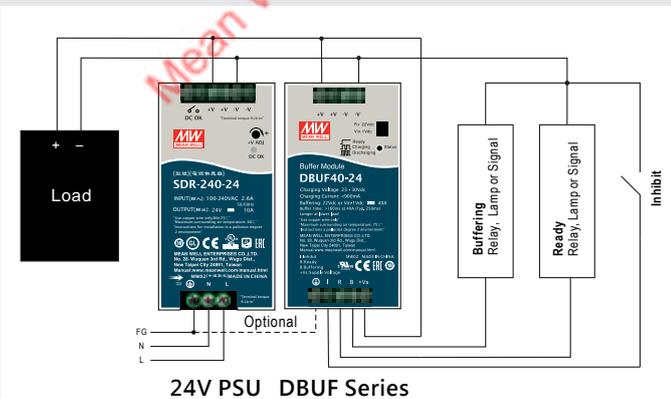

Note: 12V/ 24V/ 48V models are all applicable.

Buffer Module

DBUF Series

Extend system hold up time when AC interrupts or fails.

Note: Buffering with internal electrolytic capacitors instead of batteries, saves batteries maintenance cost.

DC-UPS Module

DR-UPS Series

Uninterruptible power supply with battery provides long buffer time when AC interrupts or fails.

Note: Buffering with external batteries, can ensure uninterrupted system operation when AC or DC power supply stops providing power.

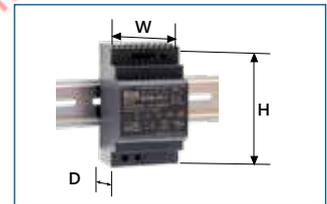

HDR Series

Plastic Case — 15~150W Slim Step Shape

Features

- Isolation class II
- 1SU~6SU narrow width
- 85~264VAC input (277VAC operational)
- No load power consumption <math><0.3W</math>
- Pass LPS (Limited power source)
- DC output voltage adjustable
- Protections : Short circuit / Overload / Over voltage
- Over voltage category III
- Cooling by free air convection
- $-30\sim+70^{\circ}C$ operating temperature
- DIN rail TS-35/7.5 or 15 mountable
- LED indicator for power on
- Suitable for building automation and control of household appliance
- 3 years warranty

NDR-480-48	48V, 10A	±1.0%	150mV	92.5%

SDR Series

Metal Case — 75~960W Slim & High Performance

Features

- 90~264VAC input (180~264VAC for SDR-960)
- Built-in active PFC function (SDR-120/240/480/960)
- High efficiency up to 94%
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Built-in constant current limiting circuit
- Cooling by free air convection
- -30~+70°C operating temperature
- Can be installed on DIN rail TS-35 / 7.5 or 15
- Complete functions:
 - ◆ 130~150% peak load capability by series
 - ◆ Current sharing up to 3840W (7+1 for SDR-480P, 3+1 for SDR-960)
 - ◆ DC OK relay contact (except for SDR-75)
 - ◆ Comply with GL (SDR-120~480), SEMIF47 (SDR-75~960)
- DC output voltage adjustable
- 3 years warranty

Dimension (WxHxD)

SDR-75	32x 125.2x 102mm

WDR/TDR Series

Metal Case — 60~480W Slim Wide Input Range / 240~960W Slim 3-phase

Features

- AC input range:
WDR- 1 ϕ and 2 ϕ , 180~550VAC ultra-wide input
TDR - 3 ϕ , 340~550VAC input
- Compact size, narrow width
- Built-in active PFC function (except for WDR-60/120, TDR-240)
- High efficiency up to 94.5%
- Built-in constant current limiting circuit
- Current sharing up to 3840W(3+1) for TDR-960
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Cooling by free air convection
- Working temperature: -30~+70°C
- Built-in DC OK relay contact (optional for TDR-480)
- Can be installed on DIN rail TS-35/7.5 or 15
- 3 years warranty

DRA/DRC Series

40~100W AC/DC Specific Power Supply

40W & 60W Output Current Programmable

Features

- 90~264VAC input
- **I_o can be trimmed 10~100% by 1~10Vdc, PWM signal or resistance**
- Protections: Short circuit / Overload / Over voltage
- Cooling by free air convection
- -30~+70°C operating temperature
- Pass LPS
- LED indicator for power on
- Can be installed on DIN rail TS-35 / 7.5 or 15
- Suitable for machine vision inspection system and plant cultivation application
- 3 years warranty

40~100W Battery Charger with UPS Security Power

Features

- 90~264VAC input
- **Single output with battery charger (UPS function)**
- **Alarm signal for AC OK and battery low**
- Protections: Short circuit / Overload / Over voltage / Battery low protection / Battery reverse polarity protection by fuse
- Cooling by free air convection
- Working temperature: -30~+70°C
- Pass LPS (DRC-40/60)
- LED indicator for power on
- Can be installed on DIN rail TS-35/7.5 or 15
- Suitable for security application
- 3 years warranty

KNX Series

640mA & 1280mA Bus Power Supply

Features

- EIB / KNX power supply with Integrated choke
- Compact size with 3SU/4SU width
- Safety extra low voltage (SELV)
- 180~264VAC input
- No load power consumption <0.5W
- Protections:
 - Short circuit / Overload (short-circuit-proof) / Over voltage
- Cooling by free air convection
- Isolation class I
- LED indicator for normal operation, bus reset and bus overload
- Over voltage category III
- -30~+70°C operating temperature
- Can be installed on DIN rail TS-35/7.5 or 15
- 3 years warranty

DDR Series

120~480W DC/DC Converter

Features

- ITE & Railway safety
- 2:1 wide input range
- **150% peak** load capability
- Protections:
Short circuit / Overload / Over voltage /
Over temperature / **DC Input reverse polarity** /
DC Input under voltage
- Cooling by free air convection
- 4000VDC I/O isolation (**Reinforced isolation**)
- **-40~+70°C** wide operating temperature
- DC output adjustable
- DC OK relay contact and Remote ON/OFF (DDR-240/480 only)
- **Current sharing** up to **1920W**
(**3+1: 960W** for DDR-240, **1920W** for DDR-480)
- Can be installed on DIN rail TS-35/7.5 or 15
- 3 years warranty

DDRH/ICL Series

60W Ultra Wide Input DC/DC Converter

Features

- 150~1500Vdc 10:1 ultra-wide input range
- Potted with silicone, dust and moisture proof
- 4KVac I/O high isolation (Reinforced isolation)
- Protections: Short circuit / Overload / Over voltage / Over temp. / DC input under voltage / DC input reverse polarity
- Cooling by free air convection
- -30~+80°C wide operating temp. (> +55°C de-rating)
- Over voltage category II
- Operating altitude up to 5000 meters
- DC OK relay contact
- Can be installed on DIN rail TS-35/7.5 or 15
- DC output voltage adjustable
- IEC62109-1 (LVD) approved
- Suitable for photovoltaic power generation, 380Vdc DC power distribution system or high voltage converter to low voltage
- 3 years warranty

DRDN/DR-RDN series

20A & 40A Redundancy Module

DRDN-20/40, ERDN20/40 and DR-RDN20 series are 20A/40A power supply redundancy modules, which can be used with the backup power supply to improve the stability and reliability of the overall system.

Features

- Output current 20A & 40A
- Support 1+1 and N+1 redundancy system
- Suitable for redundancy operation of 5V/12V/24V/48V system
- 2 channels DC input and 1 channel DC input
- 2 channels DC OK relay contact
- -40~+80°C ultra wide operating temperature
- 2 dry relay contact for monitoring output status, and LED indicator for input failure alarm
- 3 years warranty

Dimension (WxHxD)

- ① DR-RDN20 55.5x 125.2x 100mm

Series	Difference	Generation	Output Current	System Voltage	Working Temp.	Case Size
DR-RDN20		Old	20A	24V	-40~+70°C	20A: 55.5x 125.2x 100mm
DRDN20/40		New	20A/40A	12V, 24V, 48V	-40~+80°C	20A: 32x 125.2x 102mm
ERDN20/40	5V, 12V, 24V, 48V			40A: 55.5x 125.2x 100mm		

DBUF/DR-UPS40

20A & 40A Buffer Module

DBUF20/40 buffer modules are supplementary devices for regulated DC 24V power supplies. The buffer module utilizes maintenance-free electrolytic capacitors to store energy, thus eliminates the need of periodic replacement as compared to costlier batteries which also have shorter functional life span.

Features

- Buffering with **electrolytic capacitors instead of battery**, save maintenance cost
- Suitable for 24Vdc systems
- Buffering time: **350ms@20A load; 250ms@40A load**
- Buffer mode selectable by switch :
Fixed mode at 22Vdc or dynamic mode for Vin-1V
- Support parallel connection to extend buffering time
- -25~+75°C operating temperature
- 3 years warranty

Model No.	DC Operating Voltage Range	Buffer Time
DBUF20-24	22~29Vdc	350ms@20A
		700ms@10A 45s@0.1A
DBUF40-24	22~29Vdc	250ms@40A
		500ms@20A 42s@0.1A

40A DC UPS Module

DR-UPS40 is a 40A max. DC UPS (battery control) module for the 24VDC power system. Accompany with external batteries, it can back-up up to 40A of current to critical loads for certain period of time depending on the capacity of batteries. With complete monitoring signals / LED indicators for DC BUS OK, Battery Fail, Battery Discharge, and the repeated Battery Test function, users can customize their own DC UPS system to back up critical loads and capture the status of the whole system easily.

Features

- Battery controller for DIN rail **UPS system, parallel connected to DC BUS**
- Suitable for 24V system up to 40A
- Battery polarity protection
- Relay contact signal output and LED indicator for DC BUS OK, Battery Fail, and Battery Discharge
- -20~+70°C operating temperature
- 3 years warranty

Model No.	DC BUS Voltage	DC BUS Current
DR-UPS40	24~29Vdc	40A max.
